Nº	Problem	Heuristic	Description	Severity	Solution	Screenshot
1	When you set up your login credentials and press the enter key, it directs you to the register page instead of logging you in	Consistency & Standards	Pressing the enter key opens wrong page	2	Change the form submission action from “Registrar” to “Login”	
2	Logout hidden in a menu selection with no other items in it	Flexibility & Efficiency of use	Logout is not quickly accessible from the main screen	1	Put the logout button in the main screen top navigation bar	
3	Group name appears in a grey textbox, so it looks like it can be edited, but it can't.	Consistency & Standards	Textbox eludes user into thinking the group name can be altered	2	Change the appearance of the textbox.	
4	When choosing a group's preferences, there's no minimum rating for the restaurant.	User control & Freedom	There's no way to pick the minimum rating	1	Add the ability to pick a minimum rating	

5	When inputting the wrong login credentials, the message that pops up isn't written in a way that a user can understand	Match the real world	Error feedback message not explicit	3	Change error message	
6	No feedback in geofencing	Visibility of system status	When I went to Geofencing, after picking Lisbon, I didn't receive feedback that I had successfully done it.	3	After pressing ok, a pop up appears to confirm that the location has been updated.	
7	Unknown error when creating a group	Error reporting, diagnosis, and Recovery	When I attempted to create a new group, after picking the name "New group" and pressed to create, I received an error message that I couldn't understand (probably because the group already existed).	2	Change error message	
8	Choosing the price per person	User control & Freedom	When the max and min price per person is the same the slider can only be pushed in one direction (depending which was last used).	1	Checking in which direction the user is pushing before picking the slider in this situation.	
9	Didn't recognize that "Mamma Mia" was a button	Recognition, Not Recall	When I finished the roulette, I didn't recognize that "Mamma Mia" was a button that allowed to pick the location.	3	Place the text in a box to be easier for the user to know it's a button.	

10	No feedback from adding a friend to a group	Visibility of system status	In the process of creating a group, when adding a friend to the group (specifically clicking the add button), there's no feedback from the system.	3	Change the add button text or colour, communicating to the user that the friend has been successfully added to the group.	
11	Group roulette with wrong categories	Consistency & Standards	When doing a group roulette, chosen the categories "Sushi" and "Portuguese" (chosen category and friend category), the roulette then spins with the categories "Italian" and "Portuguese".	4	The roulette should spin with the correct chosen categories.	
12	Speaking the user language	Match the real world	Changing between Portuguese and English languages	2	Change the text to the target user language	

13	Position of “Registrar” and “Login” buttons	Consistency & Standards	Keeping the “Registrar” button closer to the form for login purpose than the “Login” button	3	Switch positions between both buttons	
14	Not following platform standards	Consistency & Standards	The symbol “*” is being used for required inputs, but both password inputs don’t have it.	1	Add the symbol “*” to both field inputs	
15	Doesn’t provide the options to cancel and undo operations	User control & Freedom	Doesn’t have the option to go back. (The only way to go back is using the phone interface or the main menu options)	1	Add new buttons to support undo operations	

16	Illegal operation when pressing “Faça um sorteio” button	Error prevention	By pressing the “Faça um sorteio” text the application will go to a map	3	Remove the button “Faça um sorteio”
